Reference Company Information:

Name: **City of Azusa**

Address: **213 E. Foothill Blvd., Azusa, CA 91702**

Contact Name: **Roy Bruckner**

Telephone No.: **626-812-5295**

E-mail: **rbruckner@ci.azusa.ca.us**

**A description of the project, including issues identified and addressed: Monrovia Nursery Specific Plan Monitoring (Rosedale Project).** The Project is a primarily residential development of more than 500 acres in Azusa on lands formerly used for a commercial plant nursery. The contract primarily involved monitoring but also subsurface and historical investigations for two historic homes on the property and investigation of the boundaries of a historic cemetery.

**Completion dates (estimated, if not yet completed): June 2007**

**Total fees received from services provided: \$ 199,689.75**

**Total costs of completed projects: \$ 221,015.38 (difference is reimbursables, geophysical subcontractor and Native American monitor subcontractor)**

**Description of the type and extent of Services Provided:**

We provided archaeological and paleontological monitoring, coordination with Native American monitoring subcontractor and other services as needed including testing, displays and presentations.

Investigations of the historic homes revealed trash pits associated with each and a tunnel which provided a pathway between the two houses. Research revealed one family owned the very large parcel and constructed both houses and the tunnel.

We proposed Ground Penetrating Radar testing to define any burials outside the cemetery fence. No burials were found outside the fences.

We made the vicinity of the prehistoric site part of our archaeological sensitivity map. Our monitor relocated the site during grading. Testing revealed both intact and disturbed portions of the site. Data recovery excavations were conducted in the intact portion followed by controlled machine excavation of the remainder of the site. We found prehistoric roasting ovens and 400 associated plant processing artifacts. Grading activities were redirected and no time was lost to the project.

The discovery was reported in the local press by a reporter assigned to the Rosedale project and picked up by the national press. We placed a display of the artifacts at the City Library for a highly popular six month run, facilitated associated events including rock art painting and flintknapping, presented the results to the City's Historical and Cultural Commission and City Council and provided an interpretive report with extensive graphics.

**Names of key personnel of the Respondents team that participated on the project and their specific responsibilities:** Sherri Gust, Project Manager, Principal Investigator and Report Author; Armando Abeyta and April Van Wyke, Field Supervisors for Archaeology; Kimberly Scott, Field and Lab Supervisor for Paleontology and Report Author, Amy Glover, Lab Supervisor for Archaeology and Report Author; Barbara Loren-Webb, Lithic Analyst and Report Author.
