23. PROJECT OWNER'S INFORMATION		
a. PROJECT OWNER Caltrans/MTA	b. POINT OF CONTACT NAME David Clark (Parsons)	c. POINT OF CONTACT TELEPHONE (714) 973-4880

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT *(Include scope, size, and cost)*

Description: This project involved the assessment of the cultural resources (archaeological, historical and paleontological) at nine locations where Caltrans and MTA jointly proposed to build eight sound walls in five locations along the San Gabriel River Freeway (Interstate 605) in order to provide traffic noise abatement to adjoining residences. Cogstone Resource Management Inc. was a subcontractor to the prime, Parsons-Brinckerhoff Quade & Douglass. The work product was an Archaeological and Paleontological Evaluation Report and Mitigation Plan specifically tailored to Caltrans requirements in compliance with CEQA/NEPA & Section 106.

Size: 2,800 meters

Scope of Work:

- 1) Research: Record search revealed known prehistoric archaeological, historical, and paleontological sites within a one-mile radius of the project.
- 2) Cultural Resource Inventory: A survey was conducted to assess the potential of the site to yield cultural resources with negative results, potentially impacted by the heavy vegetation at the site.
- 3) Reporting: Produced a mitigation report recommending that an archaeological and paleontological monitor be present during vegetation clearing, surface grading/ scraping, and subsurface excavation stages of this project.
